# Decker Electric

---

Progress

## Gander Outdoor and Camping World

Key field personnel Clint Allmon, Brandon Siewert and Dave Wiley are doing a great job keeping up with Dondlinger Construction's accelerated GO & CW schedule. Current construction activities include high bay light fixture installation, electrical room buildout, fire alarm and final device installation. Both buildings are scheduled for completion towards the end of May. Decker Electric has also recently been awarded the Family Fun Aqua Park located just north of the GO & CW buildings. It is scheduled to open in time for summer.

---

## Progress City of Wichita

Jason DeBerry and Eric Phelps have been working at the City of Wichita Sewer Treatment Plant #2. Decker Electric worked on the Clarifier Drive Replacement and the demolition and replacement of the screener control panel and air compressor hook-up.

---

## Progress Tyson-Holcomb

Foremen, Javier Ramos and Sergio Garcia, have been busy preparing for the new cooling system being installed on the processing floor at the Tyson Facility in Holcomb, KS. They have installed cable tray, rigid conduit, and pulled wire. Over the last several months, they have installed equipment that is on the roof and in the panel room. Including a new PLC cabinet, new fiber, a 4160 cable for a new chiller, a new lineup of switchgear and lots of wire to run all of the new equipment. Up to 10 guys have been added over the last couple of weeks to finish the work by Tyson's May 15th completion date.

Progress

Healthsouth-Wichita Falls

Seaton Construction is back on the job in Wichita Falls. We are scheduled to set the generator on April 29th, and have our tie-in outage scheduled for May 18th. Richard Claycamp is the foreman on the project.

---

## Review Highlight

# Service Department

Shout-out to Cameron Motter! His work was recognized by two customers who left reviews on google. Thank you for all your hard work!

"Cameron Motter did excellent work for me. Highly recommended."

"Cameron Motter is extremely friendly and professional! He patiently educated us when we had questions about our fixtures and volunteered to install our light bulbs on our tall ceilings. I would recommend Decker Electric 100%."

**WIRED TO HELP**

A Community Service Branch of **DECKER ELECTRIC**

Community

## Lord's Diner

The Wired to Help team is looking for volunteers (12 and older) to help at the **Lord's Diner on Tuesday, May 7th**. We will help host the evening meal which involves serving and clean up. It was a great experience for those of us who helped the first time, and we hope that others will join in too.

Those who volunteer need to be at the Lord's Diner at 5:15pm and should be done no later than 7:45pm. It will be a great way to spend the evening with your family and Decker friends! Be sure to wear your Wired to Help shirt, or, if you do not already have one, send me the size you want and I will make sure you have one before Tuesday the 7th!

It takes about 35 volunteers each night to feed the homeless at the Lord's Diner so we need to give them a good idea in the next week of how many will be coming from Decker Electric. We are not expected to provide all the volunteers for the night as other groups will be there to help too, but we would like to have a strong show of support from Decker Electric. Put this on your calendar and **sign up at Lisa's desk** as soon as possible if you can join us.

---

Progress

**Tyson-Lexington**

Foreman, Andi Krejci, Journeyman, Trent Potter and apprentices, Jake Baughman and Andrew Klump are staying busy at the Tyson facility in Lexington, NE. They are installing a carcass wash which rinses the sides of beef prior to curing. They are also installing new switchgear, cable tray, controls and lighting to prepare for new, more efficient gear. The job is scheduled for completion at the end of May.

---

Progress

**Mt. Hope**

Seaton Construction is wrapping up a small project for the Sedgwick County Area Educational Services Interlocal Cooperative #618. Their school in Mt. Hope, KS serves students with disabilities from elementary age through their early 20s. One of their classrooms had a small outdated kitchenette that did not meet their needs. Fortunately, we were able to find a way to build them an ADA-compliant kitchen, as well as a second standard kitchen for the students, all within their budget. The excitement from the students and faculty has made this project especially rewarding. Cameron Motter is the electrician on the project.
