

February 2019

Decker Electric

Progress

Gander Outdoor/ Camping World

Dondlinger and Decker Electric are currently ramping up manpower as the Camping World and Gander Outdoor Buildings become “weathered in”. Current construction involves temp power for roof-top units for temporary heat, service and mechanical wire pull, branch conduit for power and lighting and general purpose power for retail space and office areas. This fast-paced project is scheduled for completion mid-to-late May 2019.

Progress

Ronald McDonald House

Key Construction and Decker Electric are nearing substantial completion of the first phase of the Ronald McDonald Project. Current construction involves final overhead lighting, access control, and device installation. Decker Electric has also recently been awarded the Telecommunications scope for the second phase of the project. The second phase is scheduled to be completed by the end of May. Key Decker Electric on-site management consists of Ryan Atchison (Foreman).

Recently Awarded ICM-Colwich, KS

With great excitement, Decker Electric has been awarded the ICM Element Energy Island Package. The ICM project will be on an accelerated schedule with a tentative completion date the end of May. Key Decker Electric management consists of Kyle

Kennedy (General Foreman), Jesse Robinson (Project Manager) and Chris Helten (Project Coordinator).

Community

Lord's Diner

Thank you to the Decker employees and family members who volunteered at the Lord's Diner on February 5th. Volunteers served approximately 250 meals to anyone who was in need. Thanks to everyone who helped out!

Staff

Notable Work Anniversary

A big thank you and congratulations to James Helton for **5 years** at Decker Electric!

Customer Recognition

Jim Barrow

Happy birthday to one of our favorite customers, Jim Barrow. Jim is a long-time customer of Decker Electric and our #1 fan. He's had us complete a multitude of projects at his house. He speaks VERY highly of the quality of work and integrity of the

business. He knows our electricians by name and is always looking for new projects to make his home more efficient! He most recently had us install some outdoor lighting on his car port that will make his property safer and he's very excited about the switch that allows him to turn them on/off from inside his kitchen. Thank you, Jim, for being a walking advertisement for Decker!
