Decker Electric

Progress

Kansas Ethanol

Over the last year, Decker has been busy adding on to the 55-million-gallon plant at Kansas Ethanol. After over 7100 hours worked, the project is finally coming to an end. With the leadership of Jack Wilson, Marty Mapes and Brian Fair in the office, and Scott Nelson, James Helton, John Perkins and Norman King in the field, this job has been done safely and in a timely manner. Many different jobs fell under the umbrella of this project; here is a list of some of them:

- Building of a new electric building with a 3000 amp MDP and (3) 1200 amp MCC's
- Installation of new Vista switch in main power loop to feed new MCC for grains
- Wiring of (2) new 74'X136' concrete grain silos
- Wiring of new grain receiving building and grain leg
- Wiring of new fermentation tank motors, instruments and valves
- Installation and wiring of new MCC for a new cooling tower
- Wiring of new cooling tower pumps and fans
- Wiring of new yeast tank instruments and motors
- Installation of (2) new fiber lines from RIO cabinets back to the PLC
- Installation and wiring of a new ethanol load-out skid
- Installation and wiring of a new water quality cabinet and devices
- Heat tracing of water lines and CIP lines

Progress

KanPak Warehouse

Decker Electric will begin below grade work in Ark City at the 200,000 SF KanPak Warehouse this month. Currently, ARCO the General Contractor is standing pre-cast concrete walls. Lead Foreman will be Kyle Kennedy.

Staff

Decker Family Day

Thank you to everyone who came to our last Decker Family Day at Wichita Sports Forum!
We had a blast!

Staff

Decker Holiday Party

Thank you to everyone who came and enjoyed our annual Holiday Party. We hope everyone had a wonderful evening and truly appreciate all you do!

Progress

Hyper-Pet

Decker Electric is performing all electrical and telecommunications on 100,000 square feet of office and warehouse improvement. Key Personnel include Clint Allmon as Lead Foreman and are supported by Dave Wiley and Ryan Atchison.
