Decker Electric

Staff

Notable Work Anniversary

A big thank you and congratulations to Andy Krejci, Jason DeBerry and Johnny Perkins for **5 years** at Decker Electric. We especially want to recognize John Beeson, who is celebrating **15 years**!

Staff

Helping Hands Volunteer Opportunities

We have a few volunteer opportunities coming up in the next month. Please e-mail [Kristi Christy](#) if you are able to help!

Wednesday, August 8th: Next Osage Park clean-up day. Clean-up starts **4:30 PM**.

Saturday, September 8th: ICTSOS Race for Freedom 5K. We are hosting two water stations, and we need

AT LEAST 15-20 volunteers to hand out water. All Decker employees and their families are welcome and anyone who volunteers will receive a Helping Hands t-shirt.

September: We are doing electrical upgrades at Interfaith Ministries homeless shelter and need a few electricians willing to donate their time.

Please let us know if you are able to help with any of these opportunities!

Seize the Day Run/Walk

We need your help to continue the fight to stop seizures. One in 26 people are diagnosed with epilepsy and more than 250,000 children and adults in Missouri and Kansas are affected. On *Saturday, October 13th*, the Wichita Epilepsy Foundation will hold the **Seize the Day 5K Run/Walk** to benefit the Epilepsy Foundation of MO & KS.

Decker will host a team for Blaine Clark's Daughter, Emery. We would love to have you run with **"Team Emery."** Please click [here](#) for more information and to sign up!

Check Presentation and Family Day

Our next Decker Family Day will be August 16th from 5:45PM to 8PM at the Wichita Sports Forum. At this time, we will be presenting a check to Jon Rouse's family from the GoFundMe fundraiser we held in June. Thank you to everyone for your support.

We need an accurate headcount in order to order enough pizza, so please watch your inbox for an Evite to RSVP.

Complete

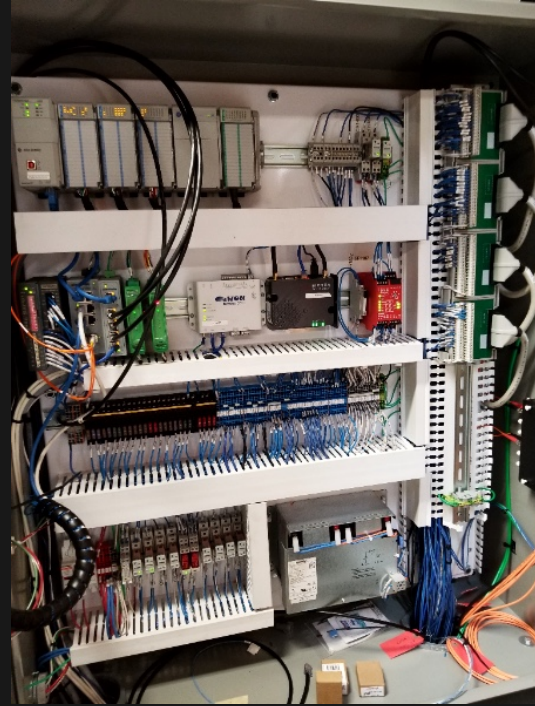

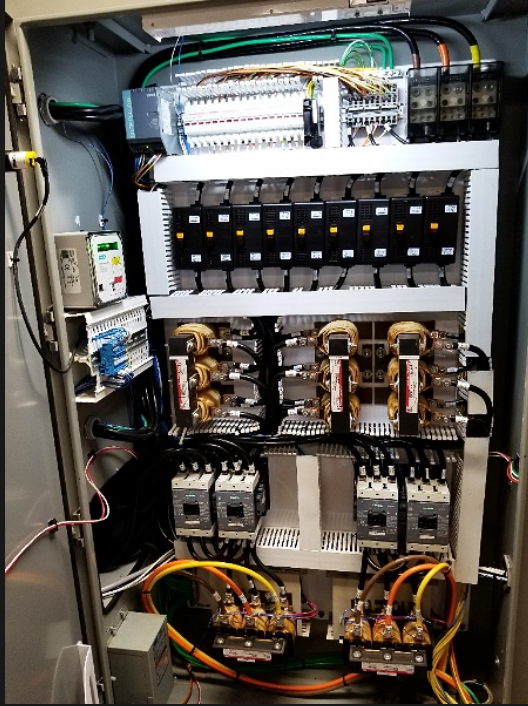

Americold Service Change

Decker Electric teamed up with Square D to provide new 2000 amp service for Americold. Americold Provides cold storage for meat and other frozen products and cannot be without power for long periods of time. With this in mind, Decker planned a shutdown to minimize the time off-line. Our crews started at 7AM Saturday, and with the help of Westar, had the power cut by 8AM. Two crews worked around the clock to install the new service and had power back on by 4M on Sunday. Our crews quickly started up the new equipment and had the facility back to normal status by 8 that evening. This project took a lot of planning and work both on-site and behind the scenes. Foremen, John Ramey and John Perkins provided excellent leadership on this time-sensitive job and their crews made it all happen. Although this job was done in less than a week from start to finish, a huge amount of Decker resources were used to give our customer a great experience. All involved should be proud.

Progress

Hershey Entertainment

Decker engineered and supplied a turn-key replacement control system for an existing ride at Hershey Park in Hershey, Pennsylvania. This included replacing the existing motor/generator DC drives with AC VFD systems.

The new system includes a spare VFD that can be selected with a button on the HMI operator interface screen to replace either of the two main VFD systems without requiring a wiring or system configuration change. This system also includes a means to capture and recycle the energy produced during the ride. Before, this energy would have been burned off as heat using large restore banks. In addition, this system features a wireless pendant that allows the maintenance crew to control the operation of the ride. All of these improvements have increased the reliability and efficiency of the ride.

Thank you to Chris Martin and the rest of the crew who made this project a success.

Progress

Enbridge Booster Pump

Project included installation and new power service to two new 4160-volt VFDs. The motors pictured above are being serviced by VFDs. In addition, we provided and installed a full UPS system, heat trace system, site lighting, cable tray, and instrumentation wiring. The project also required the construction of a relay cabinet, fiber back bone, and LV power. Thanks to foreman, James Ek, and his crew and general contractor, Minnesota Limited.

Progress
KanPak

The lighting and racking progress in the KanPak warehouse in Ark City. GF Kyle Kennedy, Foreman Ryan Aitchison, and crew have been working with General Contractor, Arco, to complete this project.

Progress

Warren Riverview Park

Dave Wiley and crew have been working on the lighting for the new Warren Riverview Park in Derby, KS. We've enjoyed working with General Contractor,
