# Decker Electric

---

Progress  
Tyson

Ron Jackson, Clint Black, and Blake Molina have been working with Tyson at their Amarillo facility to change out a switchgear that is in use. Decker electricians are working throughout the week to prepare for a short shutdown each weekend. During these shutdowns they unhook the existing power and reconnect it into a new section of switchgear that was placed the week before. All of this work has to be done without interrupting the scheduled production of the plant. Martin Shoreman from Tyson & Ron have spent a great amount of time planning out every step of the process to ensure that there is nothing that gets forgotten each week to hold up production. A big thank you to Ron and his crew for their dedication to safety and doing a great job for Tyson and Decker Electric!

---

## Staff

# Notable Work Anniversary

A big thank you and congratulations to Dinah Wiederstein and Bill Stone for five years of service at Decker Electric!

Progress

# KanPak Warehouse

Kanpak Warehouse continues to progress very well. Interior concrete pours have started and will continue for several weeks. Warehouse overhead continues. LED lighting is going up along with power to mechanical equipment. Site should have permanent power sometime this week, and office wall rough should start next week. Thank you to Kyle Kennedy and Ryan Atchison for their leadership in the field!

# Enbridge Booster Pump

James Eck, John Ramey, Darren Wilcox and Mason Smith, with assistance from Minnesota Limited, installed two 1250HP VFD's inside an elevated electric building on the Enbridge Booster Pump project in Cushing, OK. Each weighed just over 12,000 pounds,
