

March 2018 Issue

Decker Electric

Progress
ICM

Project Manager Jesse Robinson and Site Foreman Kyle Kennedy have doubled man power to help keep up with the current schedule push in Colwich, KS. Current construction activities consist of cable tray, lighting on the Boiler structure, installation of equipment and pulling wire at the Cooling Tower MCC.

Progress

Gander Outdoor/ Camping World

Due to an accelerated schedule with Dondlinger Construction, the Gander Outdoor building is nearing completion very quickly. Current construction activities consist of

high bay light installation, wire pull and final device install. Foreman Clint Allmon will be transitioning manpower over to the Camping World retail space and service bay near the first part of April. The project is scheduled for completion in early May.

Progress

Ronald McDonald House

Phase 1 of the RMDH Project is nearing completion. Project Leadership, Ryan Atchison and Norman King, are currently working hard on the last phase of the project which consists of the build-out of the Ronald McDonald family suites. The project is scheduled for completion in early May.

Progress

Valley Center Well Replacement

The Valley Center Well Replacement project has been managed by James Kelley and Tyler Helget. Jason DeBerry and Chris Martin have been the Foremen onsite and have been doing a fantastic job getting the project complete on schedule and budget. This project consists of two sites in Valley Center where the water well pumps are being moved to outside the existing structures which requires Decker Electric to install new control panels and the necessary electrical upgrades. We are nearing completion by early April.

Progress

Lockheed Martin

John Ramey and his five-member crew are working on multiple projects for a major national defense contractor in Ft. Worth, TX. Projects include constructing an aircraft-grade robotic paint booth, grounding of an air duct system, installing a cable tray, and installing conduit and wire for a new 800 amp panel for some ultrasonic equipment. John and his crew have done a great job of installing some very technical equipment. We've had a great experience partnering with our general contractor, Burns and McDonnell in such a high security location.

Staff

Notable Work Anniversary

A big thank you and congratulations to **Ronald Jackson** for **10 years** at Decker Electric and **Darren Wilcox** for **5 years**. Thank you for all you do!

Staff
Food Bank

On Wednesday, March 27th, 15 Decker employees and their families volunteered, over their lunch, at the Kansas Food Bank to pack lunches for the 'Food 4 Kids' program. 'Food 4 Kids' provides lunches to chronically hungry children who are not getting enough to eat outside of school. These lunches are distributed every Friday to schools in 85 Kansas counties. Decker employees packed nearly 1700 lunches in a 2-hour span. The 'Food 4 Kids' program depends on donations of both food and labor to operate. To learn more about how you can help, click [here](#).

Jon Spivey from the Decker Electric service department is currently working on the Enterprise Rental Car Sales Lot in Wichita, KS. Scope of work includes replacing (66) 1000 watt metal halide fixtures with 300 watt LED flood fixtures. The project is scheduled to be completed by April 10th.

Progress

Daktronics- Cessna Stadium

Thank you to Nick England and his crew for their work on the Daktronics board at Cessna Stadium. They did the electrical and the final start up.
