Decker Electric

Progress

Tyson Fresh Meats

Joslin, IL

Justin Mayfield and Ben Houchin working to install stainless steel piping for 36 motors and disconnects that are in the lower rendering area of Tyson Fresh Meats. There are many challenges in this area including low ceilings, open conveyors,

extreme heat, and working around the operations of the plant. Justin and Ben have been able to stay ahead of schedule by working long hours to keep the plant running while continuing to make progress.

Staff

Congratulations

Decker Electric is excited to have our own RCDD in house. Clint Townsend has recently obtained his RCDD certification which is a level of certification that is given to information technology systems professionals who have achieved a certain level of excellence in the field . **Congratulations Clint Townsend!**

Staff

Decker Holiday Party

Save the Date! Decker Electric would like to invite each of you to the 2018 Holiday Party scheduled for Saturday, January 26th from 7:00 to 9:30pm! This year's holiday party will be held at the Distillery 244 in Old Town similar to last year's party. Decker Electric would like to show our appreciation for the hard work and dedication of each Decker Electric employee that made this year such a success!

Please follow the below steps to RSVP for the Holiday Party and, if you would like, reserve a hotel room at the Marriott Hotel. **You must RSVP by Friday, December 14th.**

1. Samantha Alexander has sent out an EVITE to the Holiday Party. Please RSVP within the next few days. This is very important so that we can plan for the appropriate amount of food and beverages (add +1 on the EVITE if you will be accompanied by someone).
2. Please email [Tyler Helget](mailto:Tyler.Helget@decker-electric.com) if you would like to reserve a room at the Courtyard at Marriott.

Volunteer

The Arc of Sedgwick County

The Wired to Help team has volunteered to help collect donations again on **December 12** for the The Arc of Sedgwick County's "[Lights on Douglas @ St. Paul.](#)"

We will be collecting donations and handing out candy canes to cars driving through to view the beautiful Christmas lights. **We need 6 to 10 volunteers from 5:15 to 9:15.**

The Arc will graciously provide dinners for all volunteers.

A sign up sheet will be located at the front desk of Decker or you can email [Lisa Stafford](#).

A big thank you to the eight Decker employees and their families who spent their evening volunteering at the ARC of Sedgwick County Christmas Light Display. Volunteers were fortunate enough to have perfect weather to take donations and direct traffic as cars entered the display. The ARC served pizza, cookies and hot chocolate.

The ARC makes a difference in the lives of individuals and families living with intellectual and developmental disabilities. To learn more about the mission of this organization, click [here](#).

Angel Tree

The Decker Electric Wired to Help team is sponsoring an Angel Tree this year to benefit the Wichita Children's home. There is a tree located at the front desk with items needing to be purchased for kids from newborn to 18. Please have all items to Decker by Friday, December 7th. Volunteers will be taking items to the Children's Home that afternoon. If you would like, you could order items and have them delivered directly to Decker. There is no need to wrap the gifts. Thank you for all you do to spread holiday cheer to others in the community!

Thanks The Lord's Diner

Thank you to everyone who gave their time volunteering at the Lord's Diner this month. Volunteers did everything from mopping floors, cleaning off tables, doing dishes, and serving drinks. This was our first time helping at the Lords Diner as a group, and we had a great turnout! We loved working with the other volunteers and playing a part in helping our community. We encourage everyone to come out and help next time!

Training

3M Training

On Tuesday Nov 13th Decker Electric brought in 3M for some medium voltage wire termination training. Misty Williams and Brian Foldery presented the training that will allow Decker Electric to extend the warranty on our medium voltage terminations to 20 years. We spent about 4 hours in the classroom, and then about 2 hours actually making some terminations. The guys that took the class will receive a certificate from 3M in medium voltage terminations. This type of training makes Decker Electric and its employees some of the best trained electricians out there. Our customers have come to appreciate the knowledge base of Decker Electric employees. Thanks to 3M, and all of the guys who took the class.

Spotlight

Schneider Electric Innovation Summit

Ben Wilson attended the Summit in Atlanta and also had the privilege of participating in one of the panel discussions about the Schneider Electric EcoStruxure Power system. Decker Electric became the first certified EcoStruxure Power EcoXpert in the US earlier this year.
