Project Progress

TransCanada DRA Skid

Sterling Kemp has been near Middletown, MO performing the install of a DRA (drag reducing agent) located at a TransCanada Pump station. We are roughed in and currently waiting on a shutdown to complete final tie ins.

Ford County, Access Control Project

Tate and Elton are doing a great job on the Ford County Access Control Project located at the Ford County Detention Facility. The project is anticipated to complete during the month of October.

Tyson Holcomb Update

Decker Electric is currently up to 43 electricians on site and still anticipating a Thanksgiving completion timeframe.

NNG Cunningham

Progress update on NNG, Cunningham KS. The Project Team should be 100% complete with all excavation the week of October, 21st. We have turned over a total of 8 wells back to NNG. We are working actively on above ground installs which consist of installation of racks, panels, conduit tie-ins, wire pulling, grounding, terminations, testing, labeling, etc.

Encompass Health - Pleasant Gap Project

Seaton Construction Group and DEI are starting another Encompass Health generator project, this time in Pleasant Gap, PA. This project includes the addition of 2ea 500kv generators, additional generator distribution panel and quick connect, replacement of 6ea ATSS and the replacement of the main distribution panel. We got a verbal to proceed with the project on Oct. 11, flew out the next week, mobilized subcontractors and had the asphalt placed back over our conduits two weeks later in order to beat the asphalt plant shutdowns later this month.

Beggs Laboratory

The laboratory in Beggs is starting to come together. The MEP rough in is just about complete and now Seaton is on to the finishes. In the next couple of weeks the building will really start to look like a laboratory and office. Chris Brewer is doing a great job running this project for Seaton and Decker. We are ahead of schedule and the Owner could even start to move in before Thanksgiving.

Livestock Nutrition Company DDG Densification Plant

The fast track, 11 week, industrial job in Quanah, TX is entering into final start-up and production this week. General Foreman John Ramey led the team along with Foreman Brandon Seiwert. Our manpower peaked out with 15 Decker Electric employees on site and were supported by several people in our office. Manpower availability and a tight schedule were the two big challenges we faced when we interviewed for the job. It took an extraordinary effort by everyone involved to overcome those challenges and deliver the project on time and within budget.

Clarifier #2 Power and Controls Project

Jason DeBerry was in charge of installing the new Clarifier Control Cabinet and routing controls out to the new Clarifier motors.

LED Lighting Upgrade at the Sludge Dryer Building at Wichita Sewage Treatment Plant #2.

Eric Phelps led the lighting upgrade project at the Treatment Plant.

Decker Night Out

The business office joined with the women at FEE Insurance, our Decker Electric insurance broker for a fun night out! We went to Rustic Rakes and each decided on a project to make and take home. We have a lot of talented artists in our group! FEE Insurance provided food and snacks – (A big “THANK YOU” to FEE!) and we spent the evening making art projects together! It was a fun night had by all!

Walktober 2019

Decker Electric announced our first wellness committee challenge that started October 1st! Walktober is a “Walk 2 Wellness” challenge that tracks our physical activity in steps for the month of October.

- Walking reduces the risk of stroke, diabetes, and other chronic diseases
- Walking enhances mental well-being and mood
- Spending time outside in nature has been proven to improve overall wellness

We have 2 teams of 12 competing against each other to see who can get the most steps for the month. At the end of the month, the team with the least number of steps will have to pick an anonymous task out of a hat to perform in front the Decker office staff and will be posted on the Decker Facebook page. Log into our Facebook page during the first week of November to see if Team Joel or Team Victoria will be performing the anonymous task.

WALKTOBER

STEP TO SUCCESS!

2019

| WEEK 1 TOTALS | WEEK 2 TOTALS | WEEK 3 TOTALS | WEEK 4 TOTALS |

Recent Events

Epilepsy Walk

Decker Electric & Wired to Help had a great day at the Seize the Day 5k Run/Walk in Wichita, KS at the Sedgwick County Park. This event was a family friendly event which helped raised money to benefit the Epilepsy Foundation of Missouri and Kansas.

A big thank you to all who participated in this

event.

Upcoming Events

Blood Drive

Friday, November 8th from 10AM - 3PM

Roll up your sleeve and join the Decker Electric and Graybar teams in giving blood during this critical time before the holiday season. On Friday, November 8th, the Red Cross Bloodmobile will be located at Decker HQ. Come by, give blood, and help save a life!

Call Kendall at (316) 491-5172 TODAY and schedule your appointment.
